Radiological Technology

Thank you for your interest in the UAA Radiologic Technology Program. A partnership between UAA and the University of Alaska Fairbanks allows Fairbanks students to meet degree requirements for the program through the UAF Community & Technical College. The program offers students didactic and clinical education to perform radiographic procedures in the medical setting. Course content is designed to meet the Joint Review Committee on Education in Radiologic Technology (JCERT) accreditation standards. Students successfully completing the program are eligible to apply for national certification with the American Registry of Radiologic Technologist (ARRT). The Radiologic Technology Program leads to an Associates Degree of Applied Science degree (AAS) through the University of Alaska Anchorage (UAA) Community and Technical College (CTC).

The prerequisites for the Radiologic Technology Program are as follows: (UAF Catalog)

- HLTH F100X Medical Terminology
- BIOL F213X Human Anatomy and Physiology I
- BIOL F214X Human Anatomy and Physiology II

*Medical terminology is offered throughout the year and Anatomy and Physiology is a two semester sequence offered Fall/Spring and during both Summer sessions.

There are 15 credits of general education and AAS degree requirements that must be completed as well.

- Communications – 9 credits
  (ENGL F111X; ENGL F212, F211X or F213X; and COMM F131X or COMM F141X)
- Computation – 3 credits
  (DEVM F105 or MATH F151X or any math course for which these are a pre-requisite)
- Social Sciences – 3 Credits
  (PSY F101, PSY F240, or SOC F100)

We are strongly suggesting prospective students complete the general educational requirements prior to application to the program. Additional requirements include: a minimum of 8 hours of clinical observation at an approved imaging center (currently Fairbanks Memorial Hospital) (download observation checklist from the UAA website provided below), proof of immunization, two essays, a professional resume, Professional CPR Certification or Basic Life Support (BLS), and ability to pass a background check from the State of Alaska.

Admission to the Radiologic Technology program is quite competitive. The JRCERT requires a small student to instructor ratio: admissions are limited to 14 students per year in Anchorage, 2 to 4 in SE Alaska and 3-6 in Fairbanks. Students will be considered for admission to the program after a complete application has been received and ranked according to academic preparation,
written and oral communication skills, and interview. Applicants must earn a grade of “C” or better for prerequisite courses and must have a cumulative GPA of 3.0 or better to be considered. Prospective students need to apply to the University of Alaska Anchorage as a degree seeking student in pre-radiologic technology. The application for the Radiologic Technology program must be completed online and is located on the UAA website under Radiologic Technology.

The application deadline for admission into the Fall classes will be May 15th. We will start accepting applications for Fall on or around the 1st of February. We require that the prerequisites to our program be completed by the end of the spring semester the year you wish to enter the program.

For more information, please visit the University of Alaska Anchorage website at:

https://www.uaa.alaska.edu/alliedhealth/academics/radiologictechnology/index.cfm

or the UAF Community & Technical website at:
